

Silverbug Infrastructure Services Overview

In today's digital world, a business can only perform as well as its physical infrastructure.

This can be explained as those small changes that would normally get brushed under the carpet until the building is refurbished or upgraded. For example, cabling fixes, fault finding services, displays and digital signage.

Silverbug can offer a full spectrum of infrastructure services, ensuring that your infrastructure is responsive, safe and convenient to the needs of both employees and the business.

Infrastructure Cabling

Create the ideal technology environment with structured cabling, cable/comms rooms tidying and fault finding.

Wi-fi Installations

Connect to the outside world without traditional leased lines for a reliable, resilient and secure connection.

Relocation Services

Silverbug can smoothly relocate all previous infrastructure and migrate data to your new office.

Audio Visual Installations

Brighten up your workspace with modern and informative content displays. Perfect for dashboards, advertising etc.

Microsoft Teams Deployment

Bridge the gap between people working remotely and those in the office for an inclusive, modern way of working.
